

Version 6.5.2 Changes		
Change	Impacts	Description
Added Configuration to App/Devices	All Devices App	Checks Driver/App versions and notifies if an issue. Updated critical data from previous version. App name adds "Update Available") if there are updates. Run on ANY device or Run/Exit App to update all devices.
Comms Error Processing	All Devices	Clean up. Process 1. Automatically retries on 1st and 2nd consecutive error. 2. On third retry, attempts to update IP, then tries again. 3. After 3rd retry: a. Will not retry subsequent b. Sets poll interval to 30 minutes 4. If any message is successful, resets poll interval and start cycle over.
Information Logging	All Devices	Back to a preference to allow turning off.
Energy Monitor	EM Devices	Modified to eliminate end-of-year loop potential. Change power reporting to 1 watt vice previous .1 watt reporting. If device off, initial sets power to 0; then, will not get power on updates until device is on again.
Dimming Switch preferences	Dimming Switch	Changed to better match Kasa Phone app for fadeOn / Off.
Added attribute RGB	Color Bulb Light Switch	Added new (to capability color) attribute RGB. Added custom command "Set RGB" to allow controlling the device from RGB data.
State Parsing	All Bulbs Light Switch	Added check for return message change. If not changed, do not process attributes.
