

## App and Driver Update Instructions

**These instructions do NOT apply to the Hubitat version of the integration.**

<b>Caution</b>	The same major version for the App and Driver code is required to guarantee proper operation.
<b>Note</b>	If your integration is working acceptably, strongly consider NOT upgrading. If you are having problems, upgrade and try again before going to troubleshooting.
<b>Update the Code</b>	
<b>1</b>	<b>Hubitat Package Manager:</b> Update the package through HPM when prompted.
<b>2</b>	<b>Manual Application update</b> <ol style="list-style-type: none"> <li>Open the App Code.</li> <li>Copy the link on the definition line "importUrl"</li> <li>Select Import and paste the link into that line. Select <b>Import</b>.</li> <li>Save the changes.</li> <li>When complete, open the app and run reset the device database. This will cause the device to verify IP addresses and run the Updated method in each driver.</li> </ol>
<b>3</b>	<b>Manual Driver update</b> <ol style="list-style-type: none"> <li>Open the Driver Code.</li> <li>Select Import and paste the link into that line. Select <b>Import</b>.</li> <li>Save the changes.</li> <li>When complete, open the app and run reset the device database. This will cause the device to verify IP addresses and run the Updated method in each driver.</li> </ol>
<b>Run the Application</b>	
<b>1</b>	On any Kasa device, run the "CONFIGURE" Command. This only needs be done on one of the Kasa devices.

## Application and Driver File Links

To use these links, download the XLS version of the file.

<b>Kasa App</b>	<a href="https://raw.githubusercontent.com/DaveGut/HubitatActive/master/KasaDevices/Application/KasaIntegrationApp.groovy">https://raw.githubusercontent.com/DaveGut/HubitatActive/master/KasaDevices/Application/KasaIntegrationApp.groovy</a>
